

24-Port Fast Ethernet Switch

This 24-port fast Ethernet switch meets the networking needs of small to medium-sized businesses. It provides a reliable solution for expanding network capacity and improving data transfer speeds, allowing for easy connection of multiple devices.

Overview

Reliable Network Expansion

The 24-Port Fast Ethernet Switch is an efficient, plug-and-play solution designed to support the networking infrastructure of small to medium-sized businesses. It provides 24 ports for seamless connectivity between computers, printers, and servers, enhancing overall data transfer capacity. With support for auto-negotiation and auto-MDI/MDIX, this device ensures hassle-free installation and robust performance in diverse office environments.

Technical Specifications

Total Ports	24
Speed	10/100 Mbps
Connectivity Features	Auto-Negotiation, Auto-MDI/MDIX, Plug-and-Play

Management & Monitoring

Monitoring

- LED indicators per port
- Real-time status monitoring
- Simplified troubleshooting
