

24-Port Gigabit Ethernet Switch with 2 SFP Ports

This switch provides high-speed connectivity for demanding network environments. It features 24 Gigabit Ethernet ports and 2 SFP ports for fiber optic connections, offering flexibility and scalability.

Overview

High-Performance Network Connectivity

This 24-Port Gigabit Ethernet Switch is designed to provide high-speed, reliable connectivity for demanding network environments. With 24 Gigabit Ethernet ports and 2 dedicated SFP ports, it offers significant flexibility for both copper and fiber optic deployments. This solution is ideal for businesses looking to enhance network scalability and throughput.

Technical Specifications

Gigabit Ethernet Ports	24
SFP Uplink Ports	2
Port Configuration	24x 10/100/1000Mbps, 2x SFP Combo
Model Identifier	S1524GF

Key Features
