

24-Tooth Carbide Circular Saw with Laser Guide

This circular saw is equipped with a circular blade designed for cutting wood and other materials. It features a laser guide for precise cuts and a high-speed 5500 RPM motor.

Product Overview

Professional Performance Circular Saw

This high-performance circular saw is engineered for precision and durability in general-purpose cutting applications. Equipped with a carbide-tipped blade and an integrated laser guide, it ensures accurate, clean cuts through wood and various materials. The robust motor delivers a maximum speed of 5500 RPM, making it an efficient tool for demanding professional tasks.

Technical Specifications

Maximum Speed

5500 RPM
Max Speed

Blade Teeth	24
Blade Material	Carbide-tipped

Features

Key Features	Laser Guide, Carbide-tipped Blade, High-Speed Motor, Precision Cutting
