

2.4GHz Wireless Optical Mouse

This wireless optical mouse uses 2.4GHz technology for a stable connection and a range of up to 10 meters. Its ergonomic design and precise optical tracking ensure comfortable use and smooth cursor control.

Overview

Seamless Wireless Performance

The 2.4GHz Wireless Optical Mouse is designed to enhance productivity and eliminate desktop clutter with its reliable cordless design. Offering a stable connection range of up to 10 meters, it provides the freedom to work without angle or direction limits. With precise 1000DPI optical tracking, this mouse ensures smooth and accurate cursor control for both home and office environments.
