

24mm Chrome Vanadium Combination Wrench

This wrench is made of chrome vanadium steel, a strong and durable material. It features an open-end jaw on one side and a twelve-point box-end on the other, both sized for 24mm fasteners.

Product Overview

Professional Grade Combination Wrench

This 24mm combination wrench is a versatile hand tool designed for reliable performance in mechanical and industrial applications. Crafted from high-strength chrome vanadium steel, the tool provides exceptional durability and resistance to both corrosion and wear. Featuring a dual-head design with an open-end jaw and a twelve-point box-end, it ensures precise grip and turning capability for 24mm fasteners.
