

24V DC Industrial Solenoid Valve with Brass Body

This 24V DC solenoid valve is designed for industrial applications. Its robust construction includes a red solenoid coil and a brass valve body for controlling fluid flow in pneumatic and hydraulic systems.

Product Overview

Industrial Precision Flow Control

This 24V DC industrial solenoid valve is engineered for demanding fluid control applications in pneumatic and hydraulic systems. Featuring a high-durability brass body and a robust solenoid coil, it provides reliable and precise actuation for automated industrial processes. Its compact design ensures seamless integration into complex machinery where precise flow regulation is essential.

Technical Specifications

Supply Voltage	24V DC
Body Material	Brass
Compatible Systems	Pneumatic, Hydraulic, Industrial Automation

Performance Metrics

Core Performance Data

2 mm
Orifice Size
