

24VDC Power Relay with Surge Protection

This 24VDC power relay is designed for electric power transmission and distribution applications. It is ideal for industrial control and automation systems, providing reliable switching performance and protection against voltage spikes.

Overview

Reliable Switching with Surge Protection

This 24VDC power relay is engineered for demanding industrial control and automation environments. It features integrated surge protection to safeguard sensitive electrical systems against voltage spikes and transients. With a robust design and international safety certifications, it provides dependable switching performance for diverse power transmission and distribution applications.

Technical Specifications

Contact Ratings

10 A @ 250VAC
AC Rating

10 A @ 30VDC
DC Rating

Coil Voltage

24VDC

Mounting Style

DIN Rail

Compliance & Safety

Certifications

CE, cURus

Design Features

Housing & Inspection

- Transparent housing for visual inspection
- Integrated schematic diagram on housing
- Clearly labeled terminals
