Product Overview

Reliable Power Continuity

This 250A Automatic Transfer Switch (ATS) is engineered for seamless power source switching, ensuring uninterrupted power supply for critical infrastructure. Designed for durability and safety, the unit features a robust metal enclosure and comprehensive monitoring capabilities. It is an ideal solution for data centers, hospitals, and emergency services requiring dependable automatic load transfer.

Technical Specifications

Rated Current

250 A

Rated Current

Monitoring Capabilities

- MCD Voltage Monitoring
- OCB Voltage Monitoring
- I Position Indicator
- O Position Indicator
- II Position Indicator

Operation Modes

Manual, Automatic

Design and Safety

Safety Standards

CE Certified • Manual Override • Shock Hazard Protection

Installation Features

- Elevated on four legs for stability
- Secure door with multiple fasteners
- Clearly labeled terminals for easy connection

Enclosure Design

Robust metal cabinet with light gray finish
