

# 250mm Concrete Grinding Wheel

This floor wheel is designed for grinding concrete and preparing surfaces. It has a 250mm diameter with 20 segments for effective material removal and a 19mm arbor for secure mounting.

## Product Overview

### Professional Concrete Grinding Solution

The FLC10 floor wheel is a high-performance abrasive tool engineered specifically for heavy-duty concrete grinding and surface preparation. Featuring a 10-inch diameter and 20 specialized segments, it provides efficient material removal for leveling uneven surfaces. This tool is an essential choice for contractors looking to effectively strip floor coatings and prepare concrete substrates for finishing.

## Technical Specifications

### Wheel Diameter

**10 inch**

Diameter

**250 mm**

Diameter

### Segment Count

20 segments

### Arbor Size

19 mm

## Compatibility & Features

### Primary Applications

Concrete Grinding, Surface Preparation, Floor Coating Removal, Surface Leveling

### Mounting Configuration

Available with different mounting hole patterns
