Product Overview

High-Efficiency Submersible Vibration Pump

This 250W submersible vibration pump is an ideal solution for efficient clean-water management, including irrigation, mine drainage, and flood control. Engineered with high-head capabilities, the pump is designed to deliver consistent performance in demanding environments such as wells, rivers, and lakes. Its compact, durable construction ensures high energy efficiency and longevity for professional use.

Technical Specifications

Performance Metrics

250 W

Rated Power

18 L/min

Max Flow Rate

60 m

Max Head

8 bar

Max Pressure

Electrical and Protection

Feature	Specification
Voltage	230V
Frequency	50Hz
Protection Class	IP 68
Insulation Class	B

Construction & Materials

Component Materials

Component	Material
Pump Body	Aluminum
Motor Body	Aluminum
Shaft	#45 Steel
Impeller	Rubber

Operational Conditions

Operating Limits

- Fluid temperature range: 1-40 °C
- Suitable for clean water only
- Outlet size: 1/2 inch

Logistics & Extras

Included Accessories	1 Rope, 1 Clap
Packaging & Quantity	Packing dimensions: 15 x 10 x 28 cm; 5000 units per 20GP container
