

25.4cc Diaphragm Carburetor Engine

This engine has a 25.4cc discharging capacity and a standard power of 0.65/8000. It features a diaphragm carburetor and a mixed fuel ratio of 40:1.

Overview

Compact Performance Engine

This 25.4cc diaphragm carburetor engine is engineered for efficiency and reliability in demanding operational environments. Designed with a robust construction, it features optimal cooling and vibration reduction systems to ensure smooth performance and an extended service life. Its compact design makes it a versatile solution for various small engine applications requiring consistent power output.

Technical Specifications

Performance Metrics

25.4 cc

Discharging Capacity

0.65 kW

Standard Power

8000 rpm

Rated Speed

Model Number	1E34FN
Carburetor Type	Diaphragm
Mixed Fuel Ratio	40:1 (FC)

Physical Characteristics

Net Weight	4 kg
