

25A Wall-Mounted Isolator Switch with Red Indicator

This is a 25A wall-mounted isolator switch. It features a red indicator light and is designed for disconnecting power.

Product Overview

Robust Wall-Mounted Isolation

This 25A wall-mounted isolator switch is designed for reliable electrical circuit disconnection, making it an essential component for maintenance and safety protocols. Featuring a compact, white design, it integrates seamlessly into industrial or commercial environments. The inclusion of a clear red indicator light ensures immediate visual confirmation of the switch status, enhancing operational safety.
