

260mm Welded Ceramic Saw Blade for Tile Cutting

This blade is used for cutting ceramic tiles with high hardness. Its design provides high sharpness, smooth cutting surface and long-lasting performance.

Product Overview

Professional Ceramic Cutting Solution

This welded ceramic saw blade is engineered for high-precision cutting of high-hardness materials, including polished, rustic, crystal, and glazed tiles. It is designed to provide exceptional sharpness and long-lasting performance while ensuring a smooth cutting surface without chipping. Ideal for edge-trimming, mosaic creation, and general tile installation tasks, it represents a versatile tool for professional masonry and construction applications.

Technical Specifications

Core Dimensions

260 mm

Diameter

60 mm

Inner Diameter

2 mm

Thickness

10 mm

Core Height

Teeth Configuration

18 T

Compatibility and Use

Compatible Machinery

- Manual cutting machines
- Single-head automatic machines
- Multi-head automatic machines

Supported Materials

Polished tiles, Rustic tiles, Crystal tiles, Glazed tiles, Wall tiles, Floor tiles, Porcelain, Vitrified tiles

Safety Guidelines

Important Usage Warnings

Always wear ANSI-compliant eye protection during operation. Never operate the saw without the proper working guard in place or if the blade shows signs of damage such as cracks or loose tips. This blade is exclusively designed for ceramic materials and must not be used on metal or on machinery that exceeds the maximum rated RPM.
