Overview

High-Performance Rotary Hammer

This 26mm rotary hammer is engineered for demanding drilling and chiseling applications in concrete, masonry, and brick. Powered by a robust 800W motor, it delivers efficient material removal and reliable performance for both professional and DIY construction tasks. The tool features an ergonomic design with a wide trigger and a safety clutch system to ensure operator comfort and protection during extended use.

Technical Specifications

Performance specifications including impact energy, speed, and drilling capacity.

Rated Power Input	800 W
Rated Speed	550 rpm
Impact Rate	3500 bpm
Max Impact Energy	3.5 J
Max Drilling Diameter	26 mm
Weight	4.8 kg

Features

Included Accessories

- Auxiliary handle
- Depth stop
- Carrying case
- O-ring

Key Features

Safety Clutch, Variable Speed, Ergonomic Grip, SDS-Plus Chuck
