Product Overview

High Velocity Industrial Airflow

This 29-inch high velocity tripod fan is designed to deliver exceptional air circulation for large-scale environments, including warehouses, workshops, and commercial spaces. Constructed with durable aluminum blades and a sturdy metal tripod base, it ensures long-lasting reliability and performance. The fan features an adjustable height and tilt head for precise airflow control, making it a versatile cooling solution for demanding work conditions.

Technical Specifications

Power Performance

130 W

Power Consumption

120 V

Voltage

60 Hz

Frequency

Air Performance

7.2 m/s

Air Speed

4012 CFM

Airflow Volume

Design and Build

Dimensions and Weight

Feature	Value
Net Weight	8.2 KG
Cord Length	1.6 meters

Key Features

Aluminum Blades, Tripod Base, Oscillation, Adjustable Height, Adjustable Tilt Head

Logistics

40ft High Cube Container Loading
