

2FF SIM/USIM Card

This SIM/USIM card supports the 2FF form factor. It is compatible with various mobile devices and network technologies.

Product Overview

Universal Subscriber Identity Module

This USIM card is designed for high-performance connectivity within UMTS, 4G, and 3G network environments, while maintaining full backward compatibility with legacy 2G networks. Utilizing advanced data protection technology, the card ensures secure data transmission and longevity for diverse mobile communication applications. It supports a wide array of value-added services, including super directory functions and bulk messaging capabilities to meet modern market demands.

Technical Specifications

Available Capacities

- 64k
