Overview

High-Performance Silent Power Solutions

This professional-grade silent diesel generator series offers versatile power outputs ranging from 3kW to 8kW, engineered for both residential and commercial reliability. Designed with an advanced noise-reduction enclosure, it provides a quiet operating environment without compromising on performance. Equipped with high-quality copper alternators and comprehensive protective systems, this unit ensures stable, safe power delivery for diverse applications.

Performance

Key Specifications

50 Hz

Frequency

Available Power Output

3kW, 5kW, 6kW, 7kW, 8kW

Technical Features

Equipment Highlights

- 100% Copper alternator for stable inductive load handling
- Advanced Automatic Voltage Regulator (AVR)
- Low oil level alarm system
- Integrated overload protection
- Short circuit protection
- Silent-type sound-dampening enclosure

Operational Advantages

Low Noise Operation • Quick Start System • High Efficiency
