Product Overview

High-Performance Soil Preparation

The 1LY series disc plough is a fully-suspended implement designed for efficient soil cultivation with four-wheel tractors. Its robust design features rotary motion discs that effectively cut, turn, and break up soil, making it ideal for fields containing weeds, crop stalks, and challenging frictional soil. The implement is engineered to prevent clogging and grass winding, ensuring smooth operation and consistent performance.

Key Features

Operational Benefits

Tractor Mounted, Anti-Clogging Design, Adjustable Disc Angle, Crop Stalk Cutting, Three-Point Suspension

Technical Specifications

Model Specifications

Model	Working Width (mm)	No. of Discs	Weight (kg)	Matched Power (hp)
1LY-2	600	2	350	40
1LY-3	900	3	400	60
1LY-4	1200	4	470	80
1LY-5	1500	5	560	120

Working Depth

250 mm

Min Depth

300 mm

Max Depth

Linkage Type

Three-point suspension II type
