Overview

High-Performance Cutting Solution

This 3-inch abrasive cut-off wheel is specifically engineered for precision cutting of INOX, stainless steel, and precious metals. Designed for high-speed operation up to 20,400 RPM, it combines safety with exceptional sharpness and durability. The ultra-thin 3/64-inch profile ensures clean cuts with minimal material loss, making it an ideal choice for professional metalworking applications.

Key Capabilities

- High safety rating
- Superior sharpness
- Long-lasting durability
- Anti-fake marking for authenticity

Technical Performance

Operating Limits

20400 RPM

Max Rotation Speed

80 m/s

Max Linear Speed

Technical Specification Code

T41-WA60R5BF

Dimensions

Physical Specifications

Measurement	Metric (mm)	Imperial (inch)
Diameter	75 mm	3"
Thickness	1.2 mm	3/64"
Arbor Hole	9.5 mm	3/8"

Material & Construction

Abrasive Composition

- White Aluminum Oxide
- Single Aluminum Oxide
- Resin Bonded (BF)

Application

Compatible Materials

Stainless Steel (INOX), Steel, Precious Metals

Compliance & Quality

Standards & Certifications

EN12413 • ISO 9001
