

3-Inch Diesel Water Pump with Iron Casting

This high-pressure water pump features a durable iron casting construction. Powered by a diesel engine, it delivers efficient and consistent performance for various water transfer applications.

Overview

High-Pressure Diesel Water Pump

This high-pressure water pump features a durable iron casting construction, ensuring longevity and reliability in demanding environments. Powered by a diesel engine, it delivers efficient and consistent performance for various water transfer applications. With a 3-inch inlet and outlet, it offers substantial flow rates for irrigation, construction, and emergency water removal.

Technical Specifications

Inlet/Outlet Diameter	3 inch
Pump Type	Non Self-priming Clean Water Pump
Material Construction	Iron Casting
Power Source	Diesel Engine

Applications

Suitable Applications	Agricultural, Industrial, Residential, Construction, Irrigation, Emergency Water Removal
-----------------------	--

Features

Key Features

- Robust frame for stability and protection
- Compact design for easy transportation
- High-pressure performance
- Durable iron casting for longevity
