Product Overview

Reliable HVAC Control

This 3-pole magnetic contactor is engineered specifically for demanding HVAC and refrigeration applications. It provides robust switching capabilities for compressors, pumps, and other inductive loads within heating and cooling systems. Built to withstand harsh operating environments, this component ensures efficient electrical circuit control and reliable performance.

Technical Specifications

Rated Current

30 A

Rated Current

Pole Configuration	3 Poles
Operating Voltage Range	24-277V AC
Safety Standards	UL, CE

Ordering & Logistics

Payment Terms

- 30% deposit
- Balance against B/L copy

Customization Options

OEM Available • ODM Available

Typical Delivery Time	15-20 days after deposit
