

# 3-Pole Electronic AC Contactor for HVAC Systems

This 3-pole electronic AC contactor is designed for use in HVAC systems. It provides reliable switching of electrical circuits, ensuring efficient and safe operation of HVAC equipment.

## ADDITIONAL IMAGES

## Product Overview

### Reliable HVAC Control

This 3-pole electronic AC contactor is engineered for demanding HVAC and refrigeration applications. Designed for consistent performance, it ensures reliable switching for heating, ventilation, and air conditioning systems. Built to rigorous industry standards, this component offers a robust solution for definite purpose control needs.

## Electrical Ratings

Coil Voltage	240 V
Frequency	60 Hz
Resistive Amps	40 A

## Performance Metrics

### Voltage Ratings

Voltage (VAC)	FLA (A)	LRA (A)
277	30	180
480	30	150
600	30	120

## Mechanical Specifications

### Torque Requirements

- CUST Screws: 20 in-lbs
- Lugs: 40 in-lbs

Number of Poles	3
-----------------	---

## Compliance & Certification

Certifications	CUL Certified
Country of Origin	China
