Product Overview

High-Efficiency 3-Ton Wheel Loader

Designed for versatility and performance, this 3-ton front wheel loader is an ideal solution for earth-moving projects, aggregate yards, and municipal construction. It features an optimized energy-conservation drive system and a durable single-plate beam skeleton structure. The machine offers a superior load-carrying capacity and high maneuverability, making it well-suited for demanding bulk material transport tasks.

Compliance & Standards

CE Certified, ROPS/FOPS Equipped

Performance Metrics

Operational Capabilities

3000 kg

Rated Operating Load

120 kN

Max Breakout Force

Technical Specifications

Key Machine Parameters

Feature	Value
Bucket Capacity	1.5~2.5 m ³
Machine Weight	10900±200 kg
Dump Clearance (Max Lift)	2770~3260 mm
Reach (Max Lift)	1010~1210 mm

Versatility

Available Attachments

- Log clamp I / Log clamp IV
- Toad's mouth clamp
- Paired and Staggered interconvert
- Grasping grass machine
- Pallet fork
- Snowplow
