

# 3-Ton Hydraulic Auto Lift for Vehicle Maintenance

This hydraulic auto lift provides a safe and efficient way to lift vehicles for repair and maintenance. Its robust construction ensures stability and controlled lifting during operation.

## Product Overview

### Professional Vehicle Maintenance Lift

The 3-ton hydraulic auto lift is engineered for efficiency and safety in busy automotive service centers. Featuring a dual hydraulic cylinder design with a reliable chain lifting system, this equipment ensures smooth and controlled operation for various vehicle types. Integrated safety measures, including internal electric locking and automatic arm locks, provide peace of mind during maintenance tasks.

## Technical Specifications

### Rated Lifting Capacity

**3 Tons**

Capacity

### Safety Systems

Internal Electric Locking, Two-point Safety Latches, Automatic Safety Arm Locks, Steel Wire Rope Equalizing Cables

### Lifting Mechanism

Dual Hydraulic Cylinders with Chain System

## Operating Requirements

### Electrical Requirements

Multi-voltage power supply available

### Control System

Fully automatic electric control panel

## Construction

### Surface Finish

Durable Powder Coat

### Key Design Elements

- Wide base platform for extra support
- Adjustable lift pads
- Adjustable adapters
