

3-Ton Wheel Loader with Auto-Lubrication

This wheel loader offers mid-range performance for its size. It features auto-lubrication in the bucket and arm joints, as well as a sealed glass cabin and shock-absorbing seat.

Product Overview

3-Ton Wheel Loader Efficiency

The SL30WN is a high-performance 3-ton wheel loader engineered for heavy-duty material handling across construction, mining, and agricultural sectors. It features a robust powertrain and hydraulic system designed for precision, combined with a sealed glass cabin that offers an expansive field of vision. Operator comfort is prioritized through a shock-absorbing seat, while maintenance is simplified by integrated auto-lubrication systems in the bucket and arm joints.

Key Performance Metrics

Compact design optimized for maneuverability in confined spaces.

Rated Load Capacity

3 ton
Load Capacity

Operational Features

Ergonomic operator cabin designed for visibility and safety.

Operator Environment

- Sealed glass cabin
- Wide field of vision
- Shock absorbing seat

Suitable Applications

Construction • Mining • Agriculture • Material Handling

Service Technology

Auto-lubrication, Bucket-joint lubrication, Arm-joint lubrication
