

30-Meter Steel Long Tape Measure

This long steel tape measure features a 30-meter steel tape for extended measurements. It is encased in a durable, impact-resistant housing and includes a quick-release handle with a 3:1 gear ratio for efficient retraction.

Product Overview

Professional Long-Distance Measuring Tool

This 30-meter steel long tape measure is engineered for high-precision tasks in construction, surveying, and industrial applications. Built for durability, it features an impact-resistant housing and a high-quality steel blade designed for long-term reliability. The integrated 3:1 gear ratio mechanism allows for rapid and efficient tape retraction, saving valuable time on the job site.

Technical Specifications

Measuring Length	30 m
Gear Ratio	3:1
Material	Steel

Features

Key Features

- Impact-resistant housing
- Quick-release handle
- High-speed gear retraction
- Professional grade construction

Ideal Applications	Construction, Surveying, Industrial Measurement
