

300-440 kW Gas Engine

This gas engine delivers between 300 to 440 kW. It features advanced combustion technology for reduced emissions and optimized fuel consumption.

Product Overview

High-Efficiency Gas Engine Series

This gas engine series provides a compact, lightweight power generation solution ranging from 300 to 440 kW. Engineered with lean-burn technology, it offers superior fuel efficiency and reduced emissions for demanding operational requirements. Designed for durability and ease of maintenance, these engines are ideal for consistent, reliable continuous power generation across various industrial applications.

Performance Specs

Technical Comparison

Model	Prime kW	Standby kW	Fuel Type
YC6TD450N-D31	300	330	NG
YC6TD600N-D30	400	440	NG
YC6TD600N-D32	400	440	LNG/CNG

Key Features

Engine Highlights

Lean Burn Technology, Compact Structure, 1500 RPM, High Efficiency, Easy Maintenance
