

3000kg Capacity Scissor Lift for Auto Repair

This scissor lift provides a stable and even lifting platform for automotive maintenance. It features a 3000kg lifting capacity and a compact design suitable for workshops with limited space.

Product Overview

Professional Scissor Lifting Solution

This heavy-duty fixed scissor lift table is engineered for professional automotive repair environments, providing a reliable solution for lifting cargo and vehicles. With a robust 3000kg capacity, it is designed to facilitate efficient loading and unloading between ground levels and elevated work floors. The unit emphasizes operational safety, incorporating integrated protection devices to prevent overloading and hydraulic systems designed to maintain stability in the event of a pipe failure.

Technical Specifications

Lifting Capacity

3000 kg

Capacity

Safety Systems

- Overload protection device
- Hydraulic pipe breakage protection valve
- Secure locking mechanisms
- Stable scissor mechanism

Applications

Primary Applications

Automotive repair, Tire changes, Brake services, Cargo handling, Floor-to-floor logistics
