

3000m Trailer Mounted Drilling Rig

This trailer-mounted drilling rig is designed for drilling operations up to 3000 meters. Its power, transmission, control, lifting, and rotation systems are centralized on a special semitrailer chassis for easy installation and fast transport.

Overview

High-Efficiency Trailer Mounted Drilling Rig

This 3000m trailer-mounted drilling rig is engineered for professional petroleum prospecting and conventional drilling operations. Its mobile, trailer-mounted design ensures rapid deployment and efficient setup across various terrains, making it an ideal solution for foreign engineering contracting projects. Equipped with advanced drilling technology, this rig delivers reliable performance in diverse geological conditions.

Technical Specifications

Maximum Drilling Depth

3000 m

Max Depth

Rig Configuration

Trailer Mounted

Primary Applications

Petroleum Prospecting, Conventional Drilling, Petrochemical Engineering

Features

Operational Advantages

- High mobility for rapid site-to-site transport
- Optimized for diverse geological conditions
- Engineered for foreign engineering contracting
- Robust design for reliable field performance
