

300cc Diesel Engine for Industrial and Agricultural Machinery

This 300cc diesel engine is suitable for industrial, agricultural, and marine auxiliary machines. It is used in irrigation, spraying, rice transplanting, threshing, and other applications.

Product Overview

Robust Industrial Power

The F300 (F178) is a high-performance diesel engine engineered for versatility in industrial and agricultural settings. Its compact design and high power-to-weight ratio make it an ideal choice for portable machinery, including generators, water pumps, and tillers. With a focus on fuel efficiency and durability, this engine features a direct injection system and a reinforced cast iron cylinder liner for extended service life.

Technical Specifications

Power Output

6 HP Min Power	8 HP Max Power
--------------------------	--------------------------

Displacement 300 cc

Fuel Tank Capacity 3 L

Features

Engine Highlights

- Direct injection system for efficient combustion
- Durable cast iron cylinder liner
- Recoil starter system
- High power-to-weight ratio
- Compact, portable design

Applications

Suitable For Generators, Water Pumps, Tillers, Agricultural Machinery, Construction Equipment
