

30W Indoor Electric Insect Killer

This 30W insect killer is designed to eliminate flying insects indoors. It uses UV light to attract insects, which are then electrocuted by a high-voltage grid.

Overview

Effective Indoor Pest Control

The HYD-92B-2 30W electric insect killer is designed to effectively eliminate flying insects in indoor environments. Utilizing ultraviolet (UV) light to attract pests, the device uses a high-voltage grid for efficient elimination. It features a durable metal housing and a removable collection tray, making it a reliable solution for homes, offices, and commercial spaces.

Technical Specifications

Power Rating

30 W
Power

Model Number

HYD-92B-2

Features

Key Features

- Ultraviolet (UV) attraction technology
- High-voltage grid for insect elimination
- Durable metal housing
- Removable collection tray for easy cleaning
- Integrated safety switch

Suitable Environments

Residential, Office, Restaurant, Commercial
