

32-Inch LCD Computer Television Integrated Machine

This 32-inch device combines the functionalities of a computer and a television. It integrates a standard 32-inch LCD panel, allowing users to watch cable TV programs directly after powering on.

Product Overview

Integrated Computing and Entertainment

The PT32B-230 is a versatile 32-inch liquid crystal display (LCD) device designed to seamlessly integrate computer and television functionalities into a single unit. This all-in-one solution is ideal for users seeking to save space while maintaining high-quality display performance for both work and entertainment. With its dedicated Intel processor, it offers a reliable platform for various desktop computing tasks.
