

350mm Diamond Laser Welded Saw Blade

This 350mm diamond laser welded blade is designed for cutting various materials. It features laser-welded segments for enhanced durability and performance on power tools, with a maximum speed of 4,300 RPM.

Overview

Professional Diamond Laser Welded Blade

This 350mm (14-inch) diamond laser-welded blade is engineered for high-performance cutting in demanding construction environments. Featuring robust laser-welded segments, it offers exceptional durability and fast cutting speeds. It is specifically designed to handle all types of hardened concrete and reinforced concrete, making it an ideal choice for professional masonry and construction applications.

Technical Specifications

Maximum Speed

4300 1/min
Max RPM

80 m/s
Peripheral Speed

Diameter	350 mm
Construction	Laser-welded diamond segments

Applications

Suitable Materials

- Hardened concrete
- Reinforced concrete

Compliance

Certifications & Standards	ISO 9002, ISO 14001, MPA 90504
