

355mm Metal Cut-Off Grinder

This high-speed cut-off grinder is designed for precise and efficient cutting of metal materials. It features a powerful motor for rapid cutting action and an adjustable workpiece clamp for secure material holding.

Product Overview

High-Performance Cutting Solution

This 355mm metal cut-off grinder is engineered for precision and efficiency in metal fabrication, construction, and repair environments. It features a powerful motor designed for rapid cutting action, ensuring clean and accurate results on pipes, tubes, angle iron, and various metal profiles. Built for durability, the unit includes an adjustable workpiece clamp for secure material handling and essential safety features like a wheel guard and spark deflector.

Technical Specifications

Blade Diameter	355 mm
Suitable Materials	Pipes, Tubes, Angle Iron, Metal Profiles

Safety & Features

Safety Equipment

- Wheel Guard
- Spark Deflector
- Adjustable Workpiece Clamp

Ideal Applications

Metal Fabrication • Construction • Repair
