

3.5MW Rooftop Solar Power Generation System

This 3.5MW solar power system is installed on a rooftop. It is designed to generate electricity from solar energy and feed it into the power grid.

System Overview

Industrial Solar Power Generation

This 3.5MWp solar power generation system offers a robust solution for large-scale renewable energy production. Designed for commercial and industrial rooftops, the system utilizes high-efficiency CS6P modules to optimize energy harvest. Originally completed in 2008, the installation demonstrates long-term performance and reliability in a German climate.

System Specifications

System Size

3.5 MWp
Capacity

Module Type	CS6P
Completion Year	2008

Deployment Details

Installation Site	Sömmerda, Germany
Installation Type	Commercial, Industrial, Rooftop
