

36-Inch High-Velocity Drum Fan

This high-velocity drum fan is designed for industrial and commercial applications. It features a 36-inch diameter aluminum fan blade, heavy-duty motor with multiple speed settings, and a robust steel frame with integrated wheels and handle for portability.

Overview

Industrial High-Velocity Cooling

This 36-inch high-velocity drum fan is engineered for demanding industrial and commercial environments, including warehouses, workshops, and construction sites. Featuring a robust steel frame and aluminum blades, it provides reliable, powerful airflow. Designed for mobility and safety, the unit includes integrated wheels, a convenient handle, and a protective safety grille for secure operation.

Technical Specifications

Fan Diameter	36 inches
Blade Material	Aluminum
Frame Material	Steel

Features

Key Features

- Heavy-duty motor
- Multiple speed settings
- Integrated wheels for portability
- Safety grille

Recommended Applications

Warehouse, Workshop, Construction Site, Commercial Use
