

360-Degree Red Beam Cross Line Laser Level

This 360-degree red beam cross line laser projects a clear and accurate red laser line in a 360-degree horizontal plane, along with a vertical cross line. It is designed for precise alignment and leveling in construction, renovation, and installation tasks.

Product Overview

Professional Precision Leveling

This 360-degree red beam cross line laser level is a versatile tool engineered for high-precision alignment in construction, renovation, and professional installation projects. It features a smart pendulum system that enables automatic self-leveling and immediate out-of-level detection, ensuring consistent accuracy on the job site. The inclusion of a manual mode allows users to lock the laser line to project at any desired angle, providing the flexibility required for complex layout tasks like wall studding, cabinet alignment, and tiling.

Technical Features

Laser Coverage	360-degree horizontal plane and vertical cross line
Operating Modes	Self-leveling, Manual (locked) mode
Out-of-Level Indicator	Yes

Applications

Recommended Applications

- Wall studding
- Window installation
- Tile alignment
- Picture frame hanging
- Cabinet alignment
