

390W Full Black Solar Panel for Home Systems

This 390W full black solar panel is designed for residential solar systems. The high-efficiency photovoltaic module converts sunlight into electricity with exceptional performance.

Product Overview

High-Efficiency Solar Solution

This 390W solar power panel is specifically engineered for residential solar energy systems. The full black design offers a sleek, aesthetically pleasing appearance that integrates seamlessly into modern rooftops. Combining exceptional photovoltaic performance with robust construction, it provides a durable and reliable solution for consistent electricity generation at home.

Technical Specifications

Rated Power Output

390 W

Rated Power

Design Characteristics

Full Black, Residential Grade, High Efficiency

Application

Residential Solar Systems
