

# 4-Core 2.5 mm<sup>2</sup> Copper Control Cable for Substations

This copper control cable is designed for supervisory electrical equipment and station control circuits. It is suitable for indoor and outdoor installation in wet or dry locations, and its metallic armour makes it ideal for areas requiring special mechanical protection.

## ADDITIONAL IMAGES

## Product Overview

### Robust Control Cable for Industrial Substations

This 4-core control cable is engineered for reliable performance in supervisory electrical equipment and station control circuits. Featuring a durable Steel Wire Armour (SWA) and PVC sheathing, it offers exceptional mechanical protection against physical damage and harsh environmental conditions. The cable is designed for versatile installation, including indoor, outdoor, wet, dry, conduit, trench, and cable tray environments.

## Technical Specifications

Conductor Cross-section	2.5 mm <sup>2</sup>
Number of Cores	4
Voltage Rating	600 V

## Materials and Construction

Conductor Material	Annealed Copper
Insulation Material	PVC (Polyvinyl Chloride)
Armour Type	Galvanized Steel Wire

## Compliance and Standards

Applicable Standards	IEC 60228, IEC 60502-1
----------------------	------------------------

## Logistics

Minimum Order Quantity	1000 m
