

4 Cubic Meter Self-Loading Concrete Mixer

This self-loading concrete mixer has a 4 cubic meter capacity. It is designed for efficient on-site concrete production, reducing the need for separate loading equipment.

Overview

High-Efficiency Self-Loading Concrete Mixer

This 4 cubic meter self-loading concrete mixer is engineered for maximum on-site productivity, integrating loading, mixing, and discharging into a single mobile unit. Designed for versatility, it features an articulated steering structure for navigating narrow spaces and a robust chassis for heavy-duty construction environments. Operators benefit from a modern, ergonomic cabin equipped with pilot joystick controls, ensuring effortless handling and consistent concrete quality for infrastructure and building projects.

Performance

Engine Performance

4 m³

Capacity

180 °

Slewing Angle

Transmission System

- Torque converter system
- 2-3 speeds forward and reverse
- Electro-hydraulically controlled mechanical gearbox
- Dual modes: Working speed and Road transfer speed

Design & Build

Key Design Features

Articulated steering, Wear-resistant steel construction, Integrated rigid chassis, Self-priming water pump, Patented mixing technology

Hopper Specifications

Special designed hopper with 3 front teeth for improved loading capacity

Cabin & Comfort

Cabin Safety & Comfort

- ROPS and FOPS certified structure
- Air-suspension seat
- Seat warmer included
- Optional air conditioning
- Multifunction pilot joystick controls
