Product Overview

Versatile 4-Gang Control Panel

This waterproof 4-gang rocker switch panel is engineered for demanding marine and automotive environments, including boats, RVs, and trucks. Constructed from a durable blend of aluminum and ABS, it features blue LED illumination for clear status indication in low-light conditions. The integrated design includes dual USB charging ports, a digital voltmeter for real-time monitoring, and a 12V power socket, providing a centralized solution for power management and accessory control.

Electrical Specifications

Rated Current

20 A
at 12V

10 A
at 24V

Operating Voltage	12V DC, 24V DC
Switch Configuration	SPST ON-OFF Rocker
Terminal Pins	5

Integrated Features

USB Charging Ports

- 5V 1A USB Port
- 5V 2.1A High-Speed Port

Monitoring & Power

- Digital Voltmeter (DC V)
- 12V/24V Power Socket
- Horn Button

Safety Features

- Replaceable Fuses
- Over-heating Protection
- Over-current Protection
- Short Circuit Protection
- Over-charging Protection

Physical Construction

Illumination Color

Blue LED

Materials

Aluminum, ABS Plastic

Panel Finish

Local Tyrant Gold

Operating Temperature

-25 to +80

Application

Typical Controlled Devices

- LED Light Bars
- Work Lights
- Fog Lamps
- Headlights
- Taillights
- Auxiliary Lamps

Compatible Applications

Boat, Marine, Yacht, RV, Truck, Bus, Trailer, Jeep, Motorcycle
