

4-Inch Stainless Steel Submersible Water Pump

This submersible pump is designed for water supply from wells and reservoirs. It is suitable for domestic, civil, and industrial applications, as well as garden use and irrigation.

Product Overview

Professional Stainless Steel Submersible Pump

This 4-inch submersible pump is engineered for high-performance water supply from wells and reservoirs. Featuring premium AISI 304 and 316 stainless steel construction, it is suitable for domestic, civil, and industrial applications, including garden irrigation. Its durable design utilizes advanced mechanical seals and high-quality bearings to ensure long-term reliability in deep-well environments.

Working Conditions

Max Water Temperature	55 °C
Minimum Well Diameter	102 mm
Maximum Immersion Depth	40 m

Construction Materials

Material Components

Component	Material
Pump External Casing	AISI 304 Stainless Steel
Impeller	AISI 304 SS / Plastic PPO
Shaft	AISI 316 SS
Mechanical Seal	Carbon-SiC/TC
Bearing	NSK NTN

Technical Specifications

Compliance

AGS • CE

Rotational Speed	2850 1/min
Available Models	4SPM2/9, 4SPM2/13, 4SPM2/18, 4SPM2/23, 4SPM2/28, 4SPM2/40, 4SP2/55, 4SP2/65, 4SP2/75
