

4-Port Fast Ethernet Optical Network Unit

This compact optical network unit (ONU) features four Fast Ethernet (FE) ports. It is designed for residential or small business fiber-to-the-home (FTTH) deployments, providing high-speed internet access and supporting various data services.

Overview

High-Performance EPON Access

The 4-Port Fast Ethernet Optical Network Unit is designed for reliable broadband access in enterprise and residential environments. Compliant with international standards including IEEE802.3ah, it offers robust manageability and built-in switching capabilities. This versatile unit is ideal for triple-play services, video surveillance, and high-speed internet applications.

Technical Standards

Compliance Standards	IEEE802.3ah, YD/T 1475-2006, CTC 2.1
----------------------	--------------------------------------

Hardware Interfaces

Ethernet Ports	4 ports
Port Type	Fast Ethernet (FE)

Applications

Primary Applications

- Enterprise broadband access
- Triple play services
- Video surveillance
- Internet cafes

Device Features

Key Features

Compact Design • Built-in Switching • High Manageability
