

40-Foot Refrigerated Shipping Container

This 40-foot high cube refrigerated shipping container maintains temperature-sensitive cargo during transit. The container features an integrated refrigeration unit for precise temperature control and is constructed from durable steel with insulated walls.

Product Overview

Professional Cold Chain Solution

This 40-foot high cube refrigerated shipping container is expertly engineered to maintain strict temperature requirements for sensitive cargo during transit. Featuring an integrated refrigeration unit and high-performance insulated steel construction, it provides a reliable environment for perishables and pharmaceuticals. The design includes specialized internal airflow flooring to ensure consistent temperature distribution across all goods.

Technical Specifications

Refrigeration Unit

Integrated System • Precise Temp Control

Container Length	40 ft
Floor Type	T-floor for optimal airflow
Construction Material	Durable steel with insulated walls

Logistics Compatibility

Suitable Cargo Types

- Pharmaceuticals
- Produce
- Perishable goods

Transportation Compatibility	Sea, Rail, Road
