Overview

High-Performance Automotive Lighting

This 40W high-power LED spotlight is engineered for versatility, offering both high beam and low beam functionality. Featuring an advanced lens design, it delivers a precise and standard lighting pattern for enhanced road visibility. Built with integrated thermal management, this unit ensures consistent performance and long-term reliability for demanding automotive applications.

Technical Specifications

Power Consumption	40 W
Beam Capability	High Beam, Low Beam
Cooling System	Integrated Heat Sink

Features

Key Performance Metrics

40 W
Power Output

Best For

Automotive Upgrade • High-Intensity Lighting • Enhanced Visibility
