Overview

High-Capacity Silent Power Solution

This 450 kVA diesel generator is engineered for reliable, high-performance power generation in demanding industrial and commercial environments. Designed with a focus on noise reduction, the super silent enclosure ensures minimal disruption, making it an ideal choice for noise-sensitive locations. Powered by a robust engine and high-efficiency alternator, this unit provides a stable and dependable power supply for critical operations.

Technical Specifications

Rated Power Capacity

450 kVA
Capacity

Suitable Applications

- Industrial Facilities
- Commercial Buildings
- Noise-sensitive environments

Key Features

Super Silent, Industrial Grade, High Performance, Robust Construction

Noise Level

Super Silent
