

450mm (18") Steel Wrecking Bar

This 450mm (18") wrecking bar is a robust hand tool designed for prying, lifting, and demolition tasks. Constructed from hardened steel, this wrecking bar offers exceptional strength and durability.

Product Overview

Professional Grade Wrecking Bar

This 450mm (18 inch) wrecking bar is a versatile hand tool engineered for heavy-duty prying, lifting, and demolition applications. Manufactured using a drop-forged construction process, it delivers superior structural integrity and durability for demanding work environments. The design includes an angled chisel end for maximum leverage and a specialized nail puller to streamline renovation and demolition tasks.

Technical Specifications

Total Length	450 mm
Total Length (Imperial)	18 in
Manufacturing Process	Drop forged
Surface Coating	Corrosion-resistant black finish

Key Features

Tool Functions

- Heavy-duty prying
- Mechanical lifting
- Demolition work
- Nail extraction

Attributes

Hardened Steel, Corrosion Resistant, High Leverage, Ergonomic
