

450W Solar Panel for Energy Systems

This 450W solar panel is designed for solar energy systems. The module delivers optimal power output and long-term reliability.

ADDITIONAL IMAGES

Product Overview

High-Efficiency Energy Solution

This 450W solar module is engineered to provide superior energy conversion and long-term reliability for diverse solar energy systems. Designed for both residential and commercial applications, it ensures optimal power output even in challenging, low-light environmental conditions. The robust construction ensures durability against harsh weather factors, making it a dependable choice for utility-scale and rooftop installations.

Technical Specifications

Rated Power Output

450 W

Rated Power

Structural Load Capacity

- Snow Load Resistance: 5400 Pa
- Wind Load Resistance: 2000 Pa

Key Features

Performance Advantages

PID Resistant, Weak-light Performance, High Power Output, Environmental Durability

Applications

Recommended Applications

Residential • Commercial • Utility-scale
