Overview

Professional Dual-Zone Wine Preservation

This 24-inch compressor wine cooler is designed for professional-grade storage, featuring two independent temperature zones to accommodate both red and white wines at their ideal serving temperatures. The elegant stainless-steel design and double-pane glass door offer a sophisticated look suitable for both built-in cabinet installations or freestanding use. With advanced features like vibration reduction, carbon air filtration, and a smart memory function, this unit ensures your collection is preserved in optimal conditions.
