

4.8V Ni-MH Rechargeable Battery Pack

This rechargeable battery pack is designed for various electronic applications. It consists of four 3/5AAA size Nickel-Metal Hydride (Ni-MH) batteries, each with a capacity of 450mAh, providing a nominal voltage of 4.8V.

Product Overview

Reliable Power Solution

This 4.8V Ni-MH rechargeable battery pack is engineered for compact electronic applications requiring consistent and reliable power. Composed of four 3/5AAA size cells, it offers a balanced capacity of 450mAh for extended usage. Its robust design makes it an ideal choice for various portable devices.

Technical Specifications

Nominal Voltage	4.8 V
Rated Capacity	450 mAh
Battery Chemistry	Nickel-Metal Hydride (Ni-MH)
Cell Configuration	4x 3/5AAA

Safety & Handling

Disposal Warning

Do not dispose of in fire
